

REGULARITY NO NEED TO BE A PRO

There are various ways in which to go about a regularity rally. As far as the Rallye Père-Fils™ is concerned, there is no need to be a pro to take part, so everyone has a chance of winning.

Nor do you need any specific equipment, perhaps with the exception of a calculator and some common sense.

Using the roadbook provided at the start, you will cover a certain distance over which your average speed will be calculated by the Organisation. To win the race, your subsequent average speed over the various timed portions must be as close as possible to your initial average speed. It is quite straightforward; only the location of each stage's finishing line is kept secret!
